3.	Sus	tainable Coastlines in Ōtautahi/Christchurch	
	Α.	Pre-production pellet pollution and Sustainable Coastlines Christchurch Presentation	7

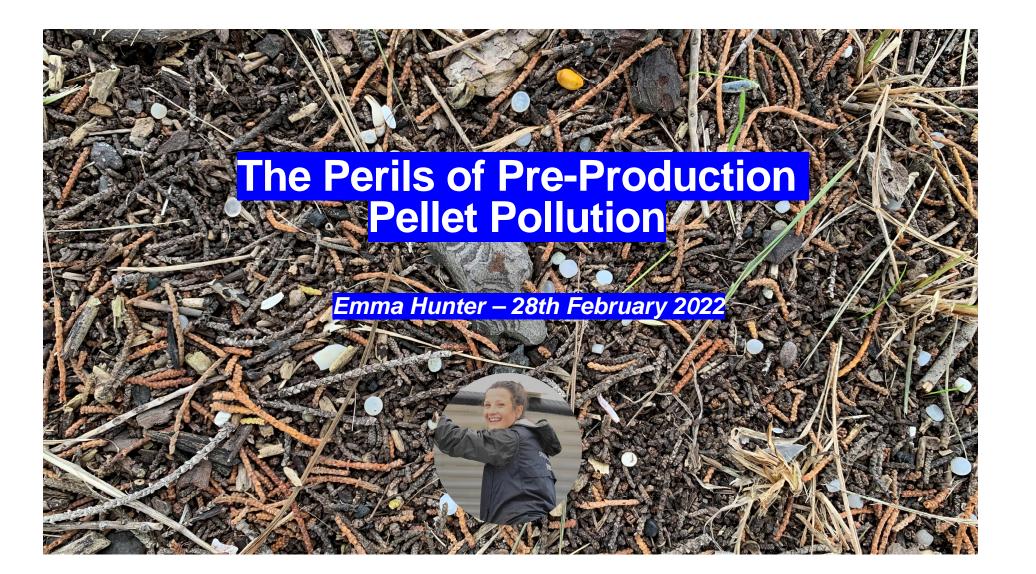

Question	Team/Unit	Answer
Why is the old Ascot golf course at the back of QE2 being so neglected? It is so well used but wasn't mowed over summer, poplars have sprouted cracking the new path, the disk golf course is substandard compared to other locations. For such a well used green space it should be maintained to at least a minimum agreed standard.	Parks	The Parks Unit are responsible for maintenance. Staff are working with contractors to capture all assets to maintain through contract.
I keep doing snap send solve. Waste of time. Why put in gardens and paving and do nothing to keep it looking tidy. Weeds bigger than plants in gardens near library. Spikes on lights but not on all posts so birds sit and poop down on seats. Rubbish bins rusting onto paving, weeds coming through paving gaps, Rubbish in gardens never cleaned up Given up !!!!! (Marine Parade New Brighton).	Road Landscape	Christchurch City Council use a combination of chemical and steam to deal with weed control. Due to this summer season being wetter than usual weed growth is an issue in places. Our contractor is aiming to deal with this however the resources are limited and also having to deal with exception grass growth due to the wetter weather. Normally in the height of summer the hot dry weather does not lead to grass and weed growth and resources are utilised to catch up on outstanding issues. Please continue to snap send solve, it is really appreciated so we can tackle these issues.
I would like to know why we have not stream lined the mowing of the grass One tractor from parks for the park. Ride on and tractor for the red zone mowing. One ride on for the Berms from roading. I understand they are different budgets but would it not make more sense to move the park grass budget to red zone budget and that would mean one less tractor and truck that brings the ride on. I am pretty sure Avondale will have the same issue.	Parks	Shifting community parks maintenance to the red zone has already begun to increase efficiency

I have a question on parks and reserves in our ward Jo. About maintenance schedules and upkeep. And the vast differences in the parks across the city depending on where you live. Lack of bins, disability parks, vegetation upkeep and dangerous over grown tree's.	Parks	Parks maintenance schedules are consistent across the city. One ward does not receive any more or any less maintenance that the other.
Lack of planting and maintenance on the roundabouts especially the one at the Pages Road bridge into New Brighton. It could be a wonderful welcome with the large palm tree 1 I have reached out to the council and they have shown zero interest in addressing these concerns.	Road Landscape	This will be checked out and any additional planting undertaken. However please note that the roots of the Phoenix Palm often make it difficult for plants to establish around its base. For example we have tried several times around the baes of the palms in New Brighton Pedestrian Mall.
Just a thought. These roadside gardens (which look amazing) should have a Council status of 'ornamental' may I suggest that it would pay for the Community Board to check with staff if that is the case. If they are then perhaps a double check to make sure the contractors have them marked on their maps. If they aren't the Community Board can request they be upgraded to ornamental. We did this for the North Beach garden Plots and the contractors do a fab job on them.	Parks and Roading	Parks - The only road side gardens which hold ornamental status maintained in the parks contract are at North Beach.
They put bark down over all the weeds at Tairoa QE2no prep or even getting rid of weeds a waste of bark as weeds will grow through and get worse.	Park	Beds are sprayed before mulching.
It's a shame that such a huge amount was spent on the design - fancy pavers, redoing the road surface etc etc etc and not even keeping the garden beds maintained is factored in. This would not happen in Sumner. (Marine Parade New Brighton).	Roading	Road Landscape has only just accepted this into the Road Landscape Contract following completion.

Question from Adrienne Smith - what is happening with the Red Zone Land in Avondale? Sadly it gets to be a bit of a dumping ground at times. Thank you.	Residential Red Zone	Currently being maintained under 13 mows a year, fences have been removed where possible, amenity levels have increased with lease and license holder activation. There is active patrols of the area to pick up rubbish and there is dumping hot-spot signage. Assistance from the community is appreciated through the Snap Send Solve App.
We moved to the Prestons Park subdivision almost a year ago and we were really looking forward to be able to walk to the numerous parks and for our grandchildren to enjoy playing on the equipment, our closest park is corner of Prestons Park Drive and Aviemore and the state of this playground is nothing short of atrocious. Someone comes in and does a quick whizz with the mower but that's the extent of the maintenance. There are far more weeds than grass, thistles aplenty as you try to negotiate your way in and apparently there is a waterway there too but ever since we have moved in it has just looked like a large deep trench full of more weeds - shocking. Though I do find it intriguing that the parks and waterways in front of the show homes are well and regularly maintained by City Care. Funny that. Please do something to beautify ALL park areas of the subdivision - all the residents keep there properties tip top so the only blots on the land scape are the Council parks.	Parks	Subdivision green spaces are handed over to the Council from developers in stages. The Council are currently following up on sites in Prestons that the developer is not maintaining.

CCC Berm.	Road Landscape	This has been put on the Berm renovation list to be assessed
I live on a corner section of Georgina Street, this has 3 berms.		in March 2022 however the original berm was installed by
When I moved into the property the berm was littered with		the sub division developer and should have been addressed
stones and rocks and very patchy grass.		at an earlier stage with the developer. Multiple reasons why
CCC expects residents to upkeep the berm at no cost to the CCC,		berms are not to standard in particular the damage caused
I don't have an issue with this, but feel the CCC should provide a		during site development.
tidy berm in the first instance.		
Many residents have spent a lot of time and money repairing or		
re-doing the berm at their own cost.		
This is not a satisfactory outcome, and something I do not want		
to undertake on behalf of the CCC.		
I have been advised the CCC will review the berm in August		
2022, this time frame is not satisfactory.		
* I would like the CCC to repair the berm to a better standard		
fronting my property.		
* * Stones and rocks I have now removed.		
* CCC should review berms on handover from the developer.		
Standard of walkways		
The walkways in the subdivision are not kept to a tidy standard,		
weeds and long grass are a common sight.		
CCC should review the schedule for maintaining the walkways to		
enhance the environment.

Quantification and Characterisation of Pre-Production Pellet Pollution in the Avon-Heathcote Estuary/Ihutai, Aotearoa-New Zealand

Emma Caitlin Hunter ^{1,*}, Raquelle de Vine ², Olga Pantos ³, Phil Clunies-Ross ², Fraser Doake ³, Hayden Masterton ³ and Robert A. Briers ¹

Item 3

AVON-HEATHCOTE ESTUARY/ TE IHUTAI

BIOLOGY

- o Key wildlife habitat: mud flats & salt marshes
- o Migratory birds: East Asian-Australasian Flyway
- 10 bird species met the criteria for International Ramsar Convention: "Significant Wetland"

HISTORY

Settlement 600+ years

- o 1290AD Waitaha
- o 1500s Ngāti Mamoe
- o 1600s Te Rūnanga o Ngāi Tahu
- o 1850s Europeans

CULTURE

- o Mahinga kai
- o Ki uta ki tai from the mountains to the sea

RECREATION

o wind surfing, sailing, walking etc

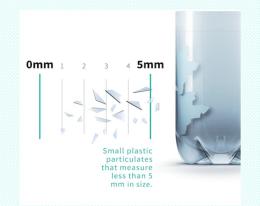

MICROPLASTICS

- o MPs measure less than 5mm in size
- hard to detect and easy for wildlife to mistake for natural prey
- some not visible to naked eye = human impacts

PRIMARY MPS intentionally created to be less than 5mm

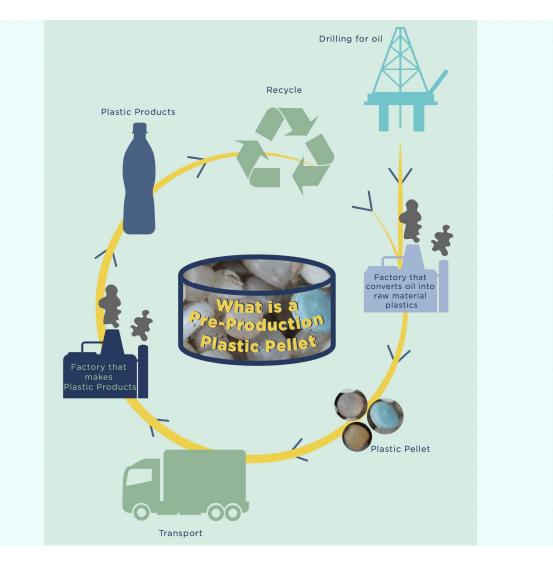

SECONDARY MPS impacted by the sun, wind and waves

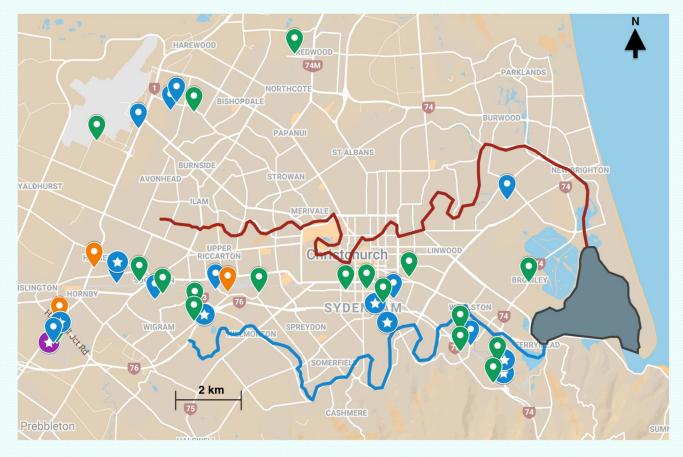

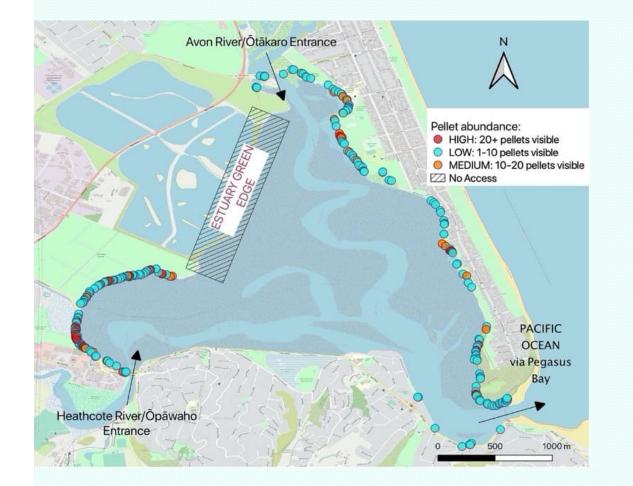

Plastics Industry in Ōtautahi/Christchurch

Rapid Estuary Assessment

- Scope estuary perimeter
- Snapshot of accumulation hotspots
- 25x25cm quadrat
 LOW: 5-10 pellets
 MEDIUM: 10-20
 HIGH: 20+

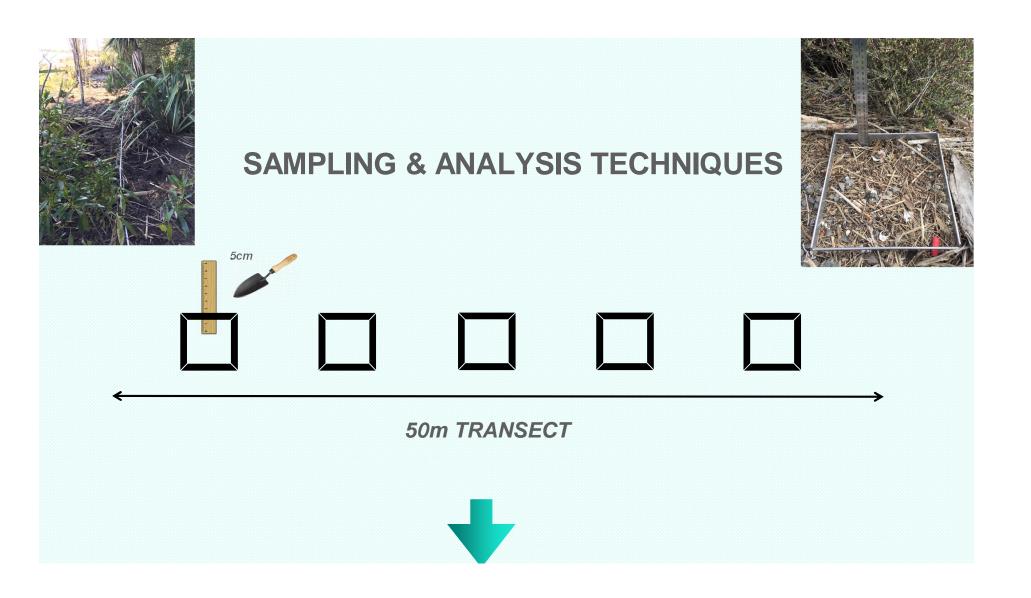

HOTSPOTS

- 1. Ferrymead Bridge
- 2. Humphreys Drive
- 3. Sandy Ponit
- 4. Bridge Street
- 5. South New Brighton Park
- 6. Penguin Street
- 7. Southshore Spit

AT HOME ANALYSIS:

Number #

Size

Shape

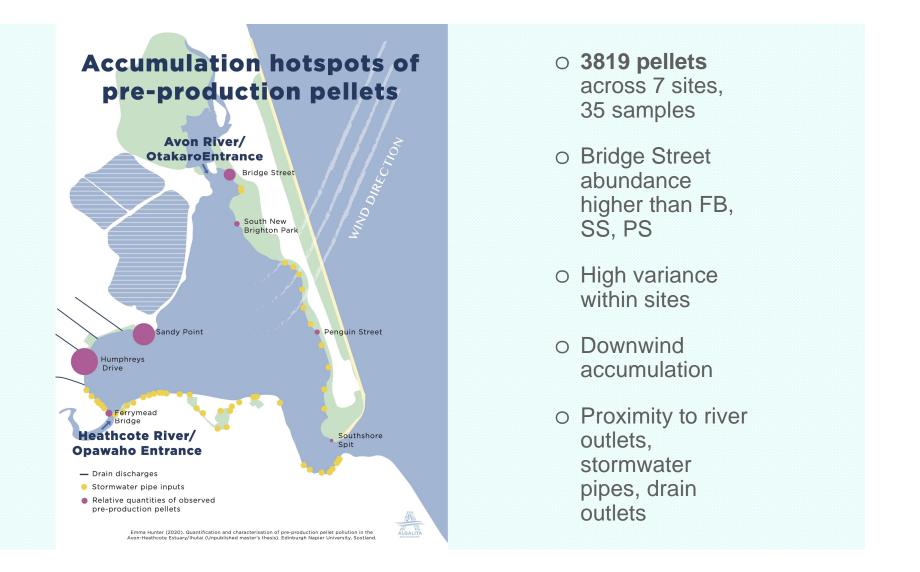

Colour

Weathering

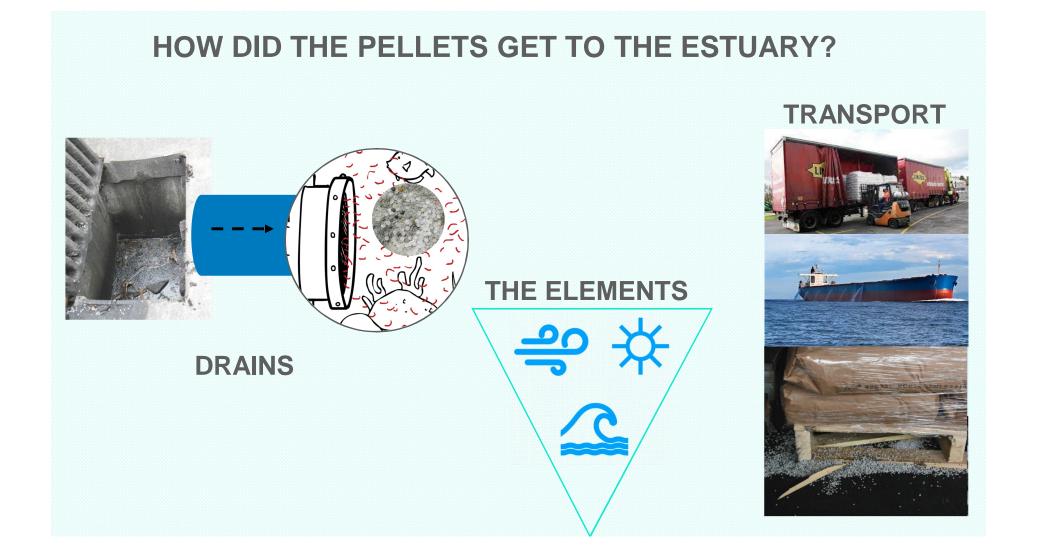

Polymer type (out sourced to ESR)

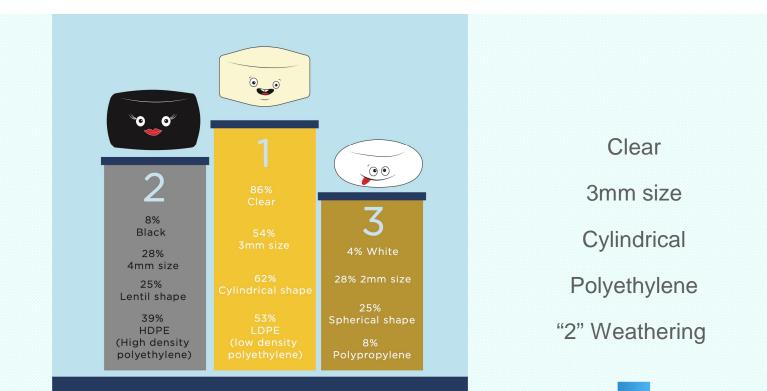

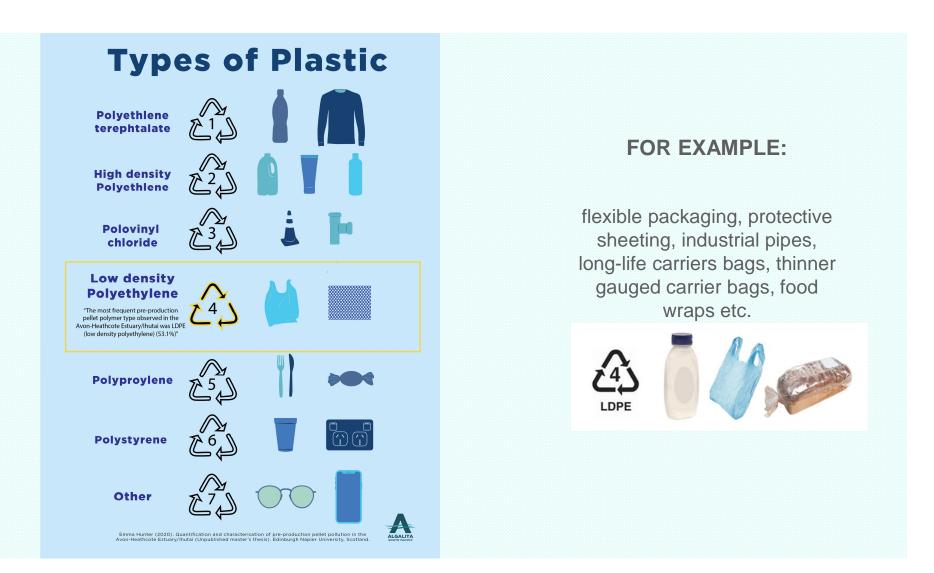

In this study, the most frequently identified characteristics of pre-production pellets in the Avon-Heathcote Estuary/Ihutai were clear, cylindrical, 3mm size andv made of LDPE (low density polyethylene). Possible products these types of pellets can be made into are plastic bags, protective sheeting, industrial pipes, cling film, plastic packaging, bottles, toys to name a few!
