# Tuna Awa Day, Term 1 Ōpāwaho

All of our classes spent the day at the awa finding out about the health of the river!

We observed that...

- There were many low level macroinvertebrates that thrive in poor water conditions
- The bottom of the awa was very muddy and boggy, we saw rubbish in the river
- The temperature and clarity of the water was OK
- There were many shortfin tuna/eel in the net (they cope alright in average conditions)
