Karakia Tīmatanga

The agenda was dealt with in the following order.

1. Apologies Ngā Whakapāha

Apologies for absence were received from Sunita Gautam and Pauline Cotter. Emma Twaddell was absent from the meeting and no apology was received.

2. Transport Programmes

Community Board Information Session/Workshop Notes

Jacob Bradbury, Manager Planning & Delivery Transport; Stephen Wright, Manager Operations (Transport); and Steve Guy, Manager City Streets Maintenance, provided an overview of the Transport Capital Programmes with the attached presentation, and addressed the Board's questions, with the assistance of David Edge, Team Leader Transport Asset Management; Lynette Ellis, Head of Transport & Waste Management; and Sharon O'Neill, Programme Manager.

Staff also discussed the programmed work in the Waipapa Papanui-Innes-Central Community Board area. The Board noted the role it can play in highlighting areas of community concern by promoting the use of Snap Send Solve and other means of logging Customer Service Requests.

The Board requested that staff:

- Review the information provided in the presentation in respect of the column indicating the ward projects sit in and update it where it does not reflect changes to ward boundaries following the representation review.
- Investigate road resurfacing for Stapletons Road from Randall Street to North Avon Road, when the Randell Street to Dudley Street section is due.
- Brief the Board on the 'St Albans - Springfield Rd & Edgeware & Abberley' school safety project with options to push this forward.
- Brief the Board on the 'Sturrocks Road at Redwood Park' minor safety intervention to understand prioritisation in the minor safety programmes as relating to the Board area.
- Provide further information on the road resurfacing planned for Rutland Street with a plan clarifying the indicated length.
- Provide information on the rationalisation around different approaches to issues with road and footpath conditions; particularly noting issues with unaddressed surface water pooling on the footpath at Westminster Street, near Gosset and Carrington streets, and the poor road conditions on those streets – these being suggested to be worse than on streets programmed for renewal. Staff to investigate the issues there.
- Provide information around options for the Greers-Northcote-Sawyers Arms Roads intersection, including monitoring to understand efficiencies extending through the Langdons and Northcote corridors, following on from the LTP carryover actions, and to assist future Annual Plan and LTP considerations being informed by the data in time for the Board submission.

4. Three Waters Programme

Community Board Information Session/Workshop Notes

Gavin Hutchison, Head of Three Waters, outlined the Three Waters programme for 2025/26 and proposed changes to the FY26 Capital programme, with the attached presentation. This had previously been provided to the Council, with Board members using the opportunity to understand the relevance of programme to projects in its area.

The Board highlighted ongoing issues with surface flooding in their area in significant rain events, such as in St Albans and Edgware, and staff noted that the Three Waters team are working on a workshop for Council to discuss the use of the surface flooding programme created through the LTP, which can consider the issues in the Board area.

3. Community Parks Rolling Renewals Programme FY25-FY27

Community Board Information Session/Workshop Notes

Bridie Gibbings, Manager Operations - Parks Development, presented to the Board with the Community Parks Rolling Renewal Programme for the current and next three years, and also ran through the attached presentation to provide examples of the renewal work.

The Board requested that staff:

- Review the planned renewal budget for Edmonds Factory Gardens, noting indication this will cover replacement of the lighting, and suggestion to consider LED lighting.
- Consider public-private partnerships for appropriate projects.
- Noting that Fortune Reserve is coming up for play space renewal, consider whether the current action to investigate a community request for a small dog park in the reserve relates to an idea that could progress at the same time as the renewal.
- Consider any opportunities for census data to inform parks renewal programme.
- Provide statistical information on new build housing in the wards as relevant to understanding intensification pressures ahead of census data being available
- Confirm coordination with the school around the Momorangi Reserve project.
